

ABSTRACT

Web-sites www.proximityservices.com,
www.accessservices.com, www.vendingmachineservices.com,
www.vehicleservices.com, www.meterservices.com,
www.picopay.com, www.tollservices.com, for all the proximity service
systems world wide are disclosed wherein customers can sign up for
5 proximity services such as toll gate services at any toll gate in the
world that has signed up to provide the service to customers, parking
meter services etc. and the proximity systems owners are guaranteed
their payments. In the preferred embodiment all transactions are
approved at the local POS (toll gate, parking meter, checkout station,
10 parking lot, pay phone, ATM, gas station, etc.) using a service
provider identification number (SPIN) issued to the service provider
owner each month for example. The local approved transactions are
guaranteed by the web-site owners and the customers each have
15 unique SPIN numbers that expire periodically such as each month.
The web-site designs are designed to work most efficiently with all in
one access devices such as, a wireless cell phone, a pager, or

master PASS unit that can directly activate proximity transaction units by delivering credit card, Smartcard, debit card, and or SPIN code data.
